ICS	Govt. Khawaja Rafique Shaheed College Walton, Lahore	78%	2020

Projects

HRMS(Human Resource Management System)

May 2023 - Present (1 month)

Company: Freelance
<https://github.com/mdZaid165201b/HRMS-BACKEND>

Tools: Node.js, Express.js, MongoDB and React.js

- This is Human Resource Management System using MERN Stack that has the following features:
- Employee Management Module
 - Attendance Module
 - Role Creation
 - Role-based access to different sections of the Human Resource Management System.
 - This HRMS has role-based permission levels similar to Netsuite basic permission levels.
 - Payroll Management Module with proper allowances, deductions, and tax calculations(In Progress).
 - Leave Management Module(Remaining)
 - Frontend part remaining (After Backend Completion).

Personal Portfolio Web Application (MERN Stack)

Apr 2023 - May 2023 (1 month)

<https://github.com/mdZaid165201b/Frontend-Personal-Portfolio>

Tools: Nodejs, Expressjs, MongoDB, Reactjs, and Cloudinary

- This is Personal Portfolio Web Application that has the following features:
- Responsive Website to showcase personal projects with images.
 - REST API developed using Nodejs, Expressjs, and MongoDB with Cloudinary to store images.
 - Users can send emails through the website.
 - Admin Panel with login functionality to add, update and delete projects related data.

PU Result Scrapper and Sender

Dec 2022 - Jan 2023 (1 month)

<https://github.com/mdZaid165201b/PU-Result-Scrapper-Optimized->

Tools: Nodejs, Node HTML Parser, Request

- This is PU Result Scrapper which will scrap results of any semester of a given roll number.
- Users can enter his/her roll number to fetch all results from his/her starting semester.

This is only a Node.JS scrapper but I have created a frontend for it using React.JS.
Here is the frontend Link: <https://capable-basbousa-c13b12.netlify.app/>

Wallpaper Scraper and Downloader

Oct 2022 - Nov 2022 (1 month)

<https://github.com/mdZaid165201b/Wallpaper-Scraper-and-Downloader>

Tools: Nodejs, Cheerio, Request

This project is related to scrapping using Nodejs. It has the following features:

- Users can enter the folder name where he/she wants to save wallpapers.
- Users can specify the category to download specific wallpapers.
- Users can specify the start page number and last page number to download wallpapers from those pages.
